

Supplementary Fig. 1. Comparison of correlation values between real and synthetic data with tabular denoising diffusion probabilistic model (TabDDPM), conditional tabular generative adversarial network + (CTABGAN+), and conditional tabular generative adversarial network (CTGAN). The described variables are (A, B, C) age, (D, E, F) heart rate (HR), (G, H, I) diastolic blood pressure (DBP), and (J, K, L) systolic blood pressure (SBP).
